

Subject index

Volume 74

- Aberrant crypt focus, asbestos, colon cancer, 183
 Acetone, CYP1A, synergistic induction, pyridine, rats, 69
 Aging, brain neoplasmas, DNA damage, 1
 8-Aminoguanine, 2-nitropropane, species difference, DNA adducts, 8-oxoguanine, 8-hydroxyguanosine, 8-hydroxydeoxyguanosine, 9
 Antigen, MMTV, cholesterol, linoleic acid, dexamethasone, 57
 Antisense oligonucleotide, p120, ISIS-3466, LOX, nucleolar antigen, 125
 Antiserum to PSP₉₄, subtractive cDNA, PSP₉₄, 91
 Arecoline, nicotine, genotoxicity, CHO cells, 105
 Aristolochic acid, v-H-ras transformed NIH 3T3 cells, genistein, tyrphostin-23, forskolin, 3-isobutyl-1-methyl-xanthine, IBMX, staurosporin, HT, neomycin sulfate, 197
 Asbestos, aberrant crypt focus, colon cancer, 183
 Atypical mitosis, oral cancer, human papillomavirus, koilocytosis, 51
- Benzo[a]pyrene, carcinogenesis, ³²P-post-labeling, trout, 111
 Bladder, piperazine, dinitrosopiperazine, rats, tumors, nasal mucosa, nitrosation, 101
 Bleomycin, cancer predisposition, chromosomal aberration, clastogen sensitivity, genotoxicity, head and neck cancer, 161
 Benzo[a]pyrene, isothiocyanates, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, chemoprevention, 151
 Brain neoplasmas, aging, DNA damage, 1
- c-raf-1 gene, H-87, MDR1 gene, protein kinase A, MDR1 promoter, 37
 C3H10T1/2 cells, morphological transformation, metabolic activation, 25
 Cancer predisposition, bleomycin, chromosomal aberration, clastogen sensitivity, genotoxicity, head and neck cancer, 161
 Carcinogenesis, benzo[a]pyrene, ³²P-post-labeling, trout, 111
 Cell line, parathyroid hormone-related protein, interleukin 1, lung cancer, humoral hypercalcemia of malignancy, 119
 Chemoprevention, isothiocyanates, benzo[a]pyrene, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, 151
 CHO cells, nicotine, arecoline, genotoxicity, 105
 Cholesterol, MMTV, antigen, linoleic acid, dexamethasone, 57
- Chromosomal aberration, bleomycin, cancer predisposition, clastogen sensitivity, genotoxicity, head and neck cancer, 161
 Chronic hepatitis, α -fetoprotein, glycosylation, tyrosinemia, hepatocellular carcinoma, 43
 Clastogen sensitivity, bleomycin, cancer predisposition, chromosomal aberration, genotoxicity, head and neck cancer, 161
 Clonality, keratinocytes, HPV16, single cell, 15
 Colon cancer, asbestos, aberrant crypt focus, 183
 Colon cancer, morphology, risk assessment, 65
 CYP1A, synergistic induction, acetone, pyridine, rats, 69
- Dexamethasone, MMTV, antigen, cholesterol, linoleic acid, 57
 DG, Deoxyguanosine, KBrO₃, potassium bromates, 8-OHdG, 8-hydroxydeoxyguanosine, HPLC-ECD, high performance liquid chromatography-electrochemical detector, 141
 Diallyl disulfide, organosulfur compounds, growth, glutathione, mammary tumor cells, 85
 Differentiation, trans-activation, hepatoma, HIV-LTR, promoter/enhancer, 75
 Dinitrosopiperazine, piperazine, rats, tumors, bladder, nasal mucosa, nitrosation, 101
 DNA adducts, 2-nitropropane, species difference, 8-aminoguanine, 8-oxoguanine, 8-hydroxyguanosine, 8-hydroxydeoxyguanosine, 9
 DNA damage, aging, brain neoplasmas, 1
 DNA single-strand breaks, N-nitrosamines, hepatotoxicity, ethanol, neonatal, 175
- Electron spin resonance (ESR) analysis, malachite green, Syrian hamster embryo cells, morphological transformation, free radical formation, spin-trapping agent, 31
 Ethanol, N-nitrosamines, DNA single-strand breaks, hepatotoxicity, neonatal, 175
- α -Fetoprotein, glycosylation, tyrosinemia, chronic hepatitis, hepatocellular carcinoma, 43
 Forskolin, v-H-ras transformed NIH 3T3 cells, genistein, tyrphostin-23, 3-isobutyl-1-methyl-xanthine, IBMX, staurosporin, HT, neomycin sulfate, aristolochic acid, 197

- Free radical formation, malachite green, Syrian hamster embryo cells, morphological transformation, electron spin resonance (ESR) analysis, spin-trapping agent, 31
- Genistein, v-*H-ras* transformed NIH 3T3 cells, tyrphostin-23, forskolin, 3-isobutyl-1-methyl-xanthine, IBMX, staurosporin, HT, neomycin sulfate, aristolochic acid, 197
- Genotoxicity, bleomycin, cancer predisposition, chromosomal aberration, clastogen sensitivity, head and neck cancer, 161
- Genotoxicity, nicotine, arecoline, CHO cells, 105
- Glutathione, organosulfur compounds, growth, diallyl disulfide, mammary tumor cells, 85
- Glycosylation, α -fetoprotein, tyrosinemia, chronic hepatitis, hepatocellular carcinoma, 43
- Growth factor-I, insulin, rat mammary carcinoma cells, 189
- Growth, organosulfur compounds, diallyl disulfide, glutathione, mammary tumor cells, 85
- H-87, *MDR1* gene, protein kinase A, *MDR1* promoter, *c-raf-1* gene, 37
- Head and neck cancer, bleomycin, cancer predisposition, chromosomal aberration, clastogen sensitivity, genotoxicity, 161
- Hepatocellular carcinoma, α -fetoprotein, glycosylation, tyrosinemia, chronic hepatitis, 43
- Hepatoma, *trans*-activation, differentiation, HIV-LTR, promoter/enhancer, 75
- Hepatotoxicity, *N*-nitrosamines, DNA single-strand breaks, ethanol, neonatal, 175
- HIV-LTR, *trans*-activation, hepatoma, differentiation, promoter/enhancer, 75
- HPLC-ECD, high performance liquid chromatography-electrochemical detector, KBrO_3 , potassium bromates, 8-OHdG, 8-hydroxydeoxyguanosine, dG, deoxyguanosine, 141
- HPV16*, keratinocytes, single cell, clonality, 15
- HT, v-*H-ras* transformed NIH 3T3 cells, genistein, tyrphostin-23, forskolin, 3-isobutyl-1-methyl-xanthine, IBMX, staurosporin, neomycin sulfate, aristolochic acid, 197
- Human papillomavirus, atypical mitosis, oral cancer, koilocytosis, 51
- Humoral hypercalcemia of malignancy, parathyroid hormone-related protein, interleukin 1, lung cancer, cell line, 119
- 8-Hydroxydeoxyguanosine, 2-nitropropane, species difference, DNA adducts, 8-aminoguanine, 8-oxoguanine, 8-hydroxyguanosine, 9
- 8-Hydroxyguanosine, 2-nitropropane, species difference, DNA adducts, 8-aminoguanine, 8-oxoguanine, 8-hydroxydeoxyguanosine, 9
- Immunohistochemistry, Tn antigen, T antigen, uterine cervical cancer, lymph node metastasis, 167
- Insulin, growth factor-I, rat mammary carcinoma cells, 189
- γ -Interferon, oncomouse, tumor necrosis factor, v-*Ha-ras* oncogene, 147
- Interleukin 1, parathyroid hormone-related protein, lung cancer, humoral hypercalcemia of malignancy, cell line, 119
- ISIS-3466, p120, antisense oligonucleotide, LOX, nucleolar antigen, 125
- 3-Isobutyl-1-methyl-xanthine, IBMX, v-*H-ras* transformed NIH 3T3 cells, genistein, tyrphostin-23, forskolin, staurosporin, HT, neomycin sulfate, aristolochic acid, 197
- Isothiocyanates, benzo[a]pyrene, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone, chemoprevention, 151
- KBrO_3 , potassium bromates, 8-OHdG, 8-hydroxydeoxyguanosine, HPLC-ECD, high performance liquid chromatography-electrochemical detector, dG, deoxyguanosine, 141
- Keratinocytes, *HPV16*, single cell, clonality, 15
- Koilocytosis, atypical mitosis, oral cancer, human papillomavirus, 51
- Linoleic acid, MMTV, antigen, cholesterol, dexamethasone, 57
- LOX, p120, antisense oligonucleotide, ISIS-3466, nucleolar antigen, 125
- Lung cancer, parathyroid hormone-related protein, interleukin 1, humoral hypercalcemia of malignancy, cell line, 119
- Lymph node metastasis, Tn antigen, T antigen, uterine cervical cancer, immunohistochemistry, 167
- Malachite green, Syrian hamster embryo cells, morphological transformation, free radical formation, electron spin resonance (ESR) analysis, spin-trapping agent, 31
- Mammary tumor cells, organosulfur compounds, growth, diallyl disulfide, glutathione, 85
- MDR1* gene, H-87, protein kinase A, *MDR1* promoter, *c-raf-1* gene, 37
- MDR1* promoter, H-87, *MDR1* gene, protein kinase A, *c-raf-1* gene, 37
- Metabolic activation, morphological transformation, C3H-10T1/2 cells, 25
- 4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanone, isothiocyanates, benzo[a]pyrene, chemoprevention, 151
- MMTV, antigen, cholesterol, linoleic acid, dexamethasone, 57
- Morphological transformation, C3H10T1/2 cells, metabolic activation, 25
- Morphological transformation, malachite green, Syrian hamster embryo cells, free radical formation, electron spin resonance (ESR) analysis, spin-trapping agent, 31
- Morphology, colon cancer, risk assessment, 65
- N*-nitrosamines, DNA single-strand breaks, hepatotoxicity, ethanol, neonatal, 175
- Nasal mucosa, piperazine, dinitrosopiperazine, rats, tumors, bladder, nitrosation, 101
- Neomycin sulfate, v-*H-ras* transformed NIH 3T3 cells, genistein, tyrphostin-23, forskolin, 3-isobutyl-1-methyl-xanthine, IBMX, staurosporin, HT, aristolochic acid, 197
- Neonatal, *N*-nitrosamines, DNA single-strand breaks, hepatotoxicity, ethanol, 175
- Nicotine, arecoline, genotoxicity, CHO cells, 105
- 2-Nitropropane, species difference, DNA adducts, 8-aminoguanine, 8-oxoguanine, 8-hydroxyguanosine, 8-hydroxydeoxyguanosine, 9
- Nitrosation, piperazine, dinitrosopiperazine, rats, tumors, bladder, nasal mucosa, 101

- Nucleolar antigen, p120, antisense oligonucleotide, ISIS-3466, LOX, 125
- 8-OHdG, 8-hydroxydeoxyguanosine, KBrO₃, potassium bromates, HPLC-ECD, high performance liquid chromatography-electrochemical detector, dG, deoxyguanosine, 141
- Oncomouse, tumor necrosis factor, γ -interferon, v-Ha-ras oncogene, 147
- Oral cancer, atypical mitosis, human papillomavirus, koilocytosis, 51
- Organosulfur compounds, growth, diallyl disulfide, glutathione, mammary tumor cells, 85
- 8-oxoguanine, 2-nitropropane, species difference, DNA adducts, 8-aminoguanine, 8-hydroxyguanosine, 8-hydroxydeoxyguanosine, 9
- ³²P-post-labeling, benzo[a]pyrene, carcinogenesis, trout, 111
- p120, antisense oligonucleotide, ISIS-3466, LOX, nucleolar antigen, 125
- parathyroid hormone-related protein, interleukin 1, lung cancer, humoral hypercalcemia of malignancy, cell line, 119
- Piperazine, dinitrosopiperazine, rats, tumors, bladder, nasal mucosa, nitrosation, 101
- Promoter/enhancer, *trans*-activation, hepatoma, differentiation, HIV-LTR, 75
- Protein kinase A, H-87, *MDR1* gene, *MDR1* promoter, *c-raf-1* gene, 37
- PSP₉₄, subtractive cDNA, antiserum to PSP₉₄, 91
- Pyridine, CYP1A, synergistic induction, acetone, rats, 69
- Rat mammary carcinoma cells, insulin, growth factor-I, 189
- Rats, CYP1A, synergistic induction, acetone, pyridine, 69
- Rats, piperazine, dinitrosopiperazine, tumors, bladder, nasal mucosa, nitrosation, 101
- Risk assessment, morphology, colon cancer, 65
- Single cell, keratinocytes, *HPV16*, clonality, 15
- Species difference, 2-nitropropane, DNA adducts, 8-aminoguanine, 8-oxoguanine, 8-hydroxyguanosine, 8-hydroxydeoxyguanosine, 9
- Spin-trapping agent, malachite green, Syrian hamster embryo cells, morphological transformation, free radical formation, electron spin resonance (ESR) analysis, 31
- Staurosporin, v-H-ras transformed NIH 3T3 cells, genistein, tyrphostin-23, forskolin, 3-isobutyl-1-methyl-xanthine, IBMX, HT, neomycin sulfate, aristolochic acid, 197
- Subtractive cDNA, PSP₉₄, antiserum to PSP₉₄, 91
- Synergistic induction, CYP1A, acetone, pyridine, rats, 69
- Syrian hamster embryo cells, malachite green, morphological transformation, free radical formation, electron spin resonance (ESR) analysis, spin-trapping agent, 31
- T antigen, Tn antigen, uterine cervical cancer, lymph node metastasis, immunohistochemistry, 167
- Tn antigen, T antigen, uterine cervical cancer, lymph node metastasis, immunohistochemistry, 167
- trans*-activation, hepatoma, differentiation, HIV-LTR, promoter/enhancer, 75
- Trout, benzo[a]pyrene, carcinogenesis, ³²P-post-labeling, 111
- Tumor necrosis factor, oncomouse, γ -interferon, v-Ha-ras oncogene, 147
- Tumors, piperazine, dinitrosopiperazine, rats, bladder, nasal mucosa, nitrosation, 101
- Tyrosinemia, α -fetoprotein, glycosylation, chronic hepatitis, hepatocellular carcinoma, 43
- Tyrphostin-23, v-H-ras transformed NIH 3T3 cells, genistein, forskolin, 3-isobutyl-1-methyl-xanthine, IBMX, staurosporin, HT, neomycin sulfate, aristolochic acid, 197
- Uterine cervical cancer, Tn antigen, T antigen, lymph node metastasis, immunohistochemistry, 167
- v-H-ras transformed NIH 3T3 cells, genistein, tyrphostin-23, forskolin, 3-isobutyl-1-methyl-xanthine, IBMX, staurosporin, HT, neomycin sulfate, aristolochic acid, 197
- v-Ha-ras oncogene, oncomouse, tumor necrosis factor, γ -interferon, 147
